

ARCAM HDA

HEAR EVERYTHING.

THE SA10

OUR BEST PERFORMING A/B AMPLIFIER

- Extremely efficient class A/B amplification
- 50W of power per channel
- 5 analogue inputs including phono
- 3 digital inputs
- 32-bit DAC, Sabre ESS9016K2M
- Full I/P control
- Total harmonic distortion + noise = 0.003%

CLEARING THE PATH

In any amplifier, the signal path is at the mercy of anything that creates noise within the unit. Thus, we spare no expense in using only the most high-quality components, even if it means the cost of our power supplies overtaking that of everything else.

THE RESULT, OF COURSE, IS WORTH EVERY PENNY.

A singer's sharp intake of breath before hitting the chorus, a guitarist's fingers sliding against the strings – it's those seemingly minor details that can bring music to life.

Fish out one of your all-time favourite albums and play it through a Bluetooth speaker, and guess what? Its sounds like a Bluetooth speaker. Play it through the SA10, and it's as close to hearing the artist's performance as you're likely to get.

There's always joy in digging out an old recording you haven't heard in years. With the HDA range, it'll feel like hearing it for the first time.

Part No.	Model	Outer Box dimensions			Weight	Weight	EAN
		L (mm)	W (mm)	H (mm)	(packed)	(net)
